EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Freeman on May 19, 2004.

2. The application has been amended as follows:

--said first and second outer support connection locations of said second bracket extending at a right angle with respect to said first bracket;-- has been added after "bracket," in claim 12, line 20.

--said first and second outer support connection locations of said second pair of brackets extending at a right angle with respect to said first pair of brackets;-- has been added after "plane;" in claim 33, line 29.

--said first and second outer support connection locations of said second bracket extending at a right angle with respect to said first bracket;-- has been added after "bracket," in claim 37, line 23.

--said first and second outer support connection locations of said second pair of brackets extending at a right angle with respect to said first pair of brackets;-- has been added after "plane;" in claim 54, line 32.

3. Claims 12-57 are allowed.

4. The following is an examiner's statement of reasons for allowance:

With respect to claims 12-32: The prior art does not disclose or suggest a coupling element for an angle-measuring device for connecting a first component to a second component in a radially resilient, but torsion-proof manner with respect to the axis of rotation, wherein a first and second outer support location of a second bracket extends at a right angle with respect to a first bracket in combination with the remaining limitations of the claims.

With respect to claims 33-36: The prior art does not disclose or suggest a coupling element for an angle-measuring device for connecting a first component to a second component in a radially resilient, but torsion-proof manner with respect to the axis of rotation, wherein a first and second outer support locations of a second pair of brackets extends at a right angle with respect to a first pair of brackets in combination with the remaining limitations of the claims.

With respect to claims 37-53: The prior art does not disclose or suggest an angle-measuring device comprising a first and second outer support location of a second bracket

Art Unit: 2859

extends at a right angle with respect to a first bracket in combination with the remaining limitations of the claims.

With respect to claims 54-57: The prior art does not disclose or suggest an angle-measuring device comprising a first and second outer support locations of a second pair of brackets that extends at a right angle with respect to a first pair of brackets in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda J Hoolahan whose telephone number is (571) 272-2246. The examiner can normally be reached on Monday through Friday 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
